

Semester Final Syllabus

CSE 2103(Data Structure)

1. Doubly Linked List, Circular Linked List
2. Stack, Arithmetic Expression : Infix, Prefix, Postfix (definition, conversion, evaluation)
3. Recursion using Stack
4. Queue, Deque, Priority Queue
5. Graph, Graph representation, BFS, DFS
6. Tree, Classification of Tree, Binary tree, Tree traversal techniques
7. Binary Search Tree, Recursive and non-recursive algorithms of BST
8. Hashing (Only theoretical questions)

CSE 2105(Digital Logic Design)

1. Switch controlled 4 bit adder subtractor
2. BCD Adder
3. Multiplexer(MUX), Demultiplexer(DeMux)
4. Decoder, Encoder, Priority Encoder
5. Synchronous Sequential Logic
6. Registers and Counters
7. 5 and 6 variable K-map
8. Quine - Mc McCluskey / Tabulation Method
9. Hamming Code

EEE 2141(Electronic Devices & Circuits)

1. BJT Basics, DC biasing, AC analysis
2. MOSFET
3. Op-Amp
4. Filters
5. Oscillator Circuits
6. Power Electronic Devices
7. IC Fabrication

MATH 2101(Complex Variable, Laplace Transformation & Statistics)

1. Complex : suggestions only
2. Statistics : From measures of Dispersion/Variation to Continuous Probability Distribution

HUM 2109(Society, Ethics & Technology)

1. All materials except Material 04,05,06,07 (Week 3 & 4 is deducted from course outline)
